

1 YONGE DENTIST

105-1 YONGE STREET
TORONTO, ONTARIO
M5E 1E5
416. 363.5005

To our new and existing patients

Please note, during this lockdown and stay at home restrictions, dentistry continues to be an essential service. The recent Stay-at-Home Order made under the Emergency Management and Civil Protection Act allows Ontarians to be able to travel to access dental care.

Keeping our staff and our patients safe is our top priority. We are following the rapidly evolving Covid-19 protocols and recommendations from our public health officials as well as our own regulatory body, the Royal College of Dental Surgeons of Ontario.

What can you expect when you come to our office?

- Everyone entering the office will be wearing a mask, except for during treatment.
- Patients will be screened for COVID-19 symptoms both the day before their appointment and upon arrival at our office.
- You will be asked to sanitize your hands.
- Your temperature will be taken with a touchless thermometer.
- Due to physical distancing, you will be seated right away or asked to wait outside our office.
- We ask that you come alone unless you are coming with a child.
- Appointments will be spread out to allow disinfection of the operatories between patients.
- We have installed powerful air purifiers in all the operatories as well as the reception area, which work continuously. After the treatment is completed, the room is left, and air purifiers are turned on turbo speed for 15 minutes to clean the room.
- We check our staff's temperature twice/daily and for any COVID-19 symptoms.
- Our staff will be wearing personal protective equipment, including masks, surgical gowns, gloves, and face shields.
